

Game Day Inclement Weather Guidelines

This is a brief description of the Game Day plan when rain or other bad weather is forecast. Scottsdale Soccer will use the Club web site to communicate information regarding game cancellations. Should bad weather be in the forecast, please check www.scottsdalesoccer.com for the latest information. Here is the kind of information that may be shown on the web site:

Weather is threatening but game fields are open and all games are being played until further notice. This means teams are to show up as scheduled, ready to play. If things change suddenly, Field Marshals or Referees at the game site will be in charge of disseminating any additional information.

Fields are currently too wet to play. Check back every 90 minutes to see if field conditions have improved. This means the first games of the day have been cancelled due to poor field conditions. This does not mean that the whole game day has been cancelled. Keep checking as instructed on the web site as game play may begin as scheduled should field conditions improve.

Fields are too wet to play and will not improve during the day. All games have been cancelled. This means there is no hope of the fields improving and all games are cancelled for the day.

It is possible for some game locations to be closed and others open. Please read the web site carefully to make sure your game status is understood. The web site is used in order to get accurate and consistent information to the most people at the same time.
